Exactly what you need

Industrial Scientific proudly introduces the incredibly versatile, completely customizable, and uniquely adaptable survival tool for every application, the iTX. Designed to grow with your changing needs, the iTX is everything you need it to be today and anything you could want it to be tomorrow to provide protection in practically any hazardous environment.

For every application

Now, a single compact monitor gives you unlimited flexibility for any application. Intuitive and field expandable, it can monitor from one to six gases simultaneously, allows you to set your own personal datalogging and alarm parameters, and even protects your settings with advanced security features. And it's so intuitive and easy to use, you'll be able to configure your iTX in just a matter of minutes.

Rugged and reliable

The iTX is housed in an ultra-tough, 24-gauge stainless steel case to keep on providing reliable protection in even the most harsh environments. Packed with easy-to-use features, the iTX is everything you need it to be. Visit www.myiTX.com for an interactive look at this amazing new multi-gas monitor. Once you see all the iTX can do, you'll wonder how you ever survived without it.

If you do not have access to the internet, just remove the attached postcard and drop in the mail, or contact your local safety distributor for more details.

The iTX is ready to use with your DS1000 Docking Station™ so you can automatically calibrate, re-charge, download data, review instrument diagnostics and print out detailed reports at any time.

And the iTX is field-upgradable, allowing you to easily configure it for practically any application.

Where's my iTX?

Send me the details on this revolutionary portable gas monitor! I've made the necessary corrections to my mailing address on the opposite side of this card.
